BIRDIE FLIGHT CHANDELIER

The modernist Birdie Flight Chandelier is an abstract poetic design, a flight of fancy which suggests the movement of birds in flight. Movement and change lie at the heart of this elegant design, the articulated arms and Birdie shades allowing the shape of the chandelier to be constantly refreshed. The stylised Birdie lights, and the three horizontal branch arms, can all be rotated, moved vertically and re-ordered, to create an ever changing graphic visual pattern.

Shown in bronze.
