CADENCE CHANDELIER

The Cadence is a centrepiece Constructivist inspired chandelier, combining elegant lengths of contrasting rich materials and textures to create a dynamic, multi-layered geometric light. Contrasting with the simplicity of the horizontal sections, the chandelier has two intricately cut decorative structural uprights. The graphic patterned verticals act as a counterpoint to the slim lengths of metal and transparent lucite, with their subtly contrasting hand patinated textures and material properties.

Shown in Satin Brass.

Dimensions

Length 160cm 63"

Width 46cm 18"
