

MARTIN HUXFORD

ELEMENT SQUARED WALL

A dramatic geometric wall light, created from a multitude of individually hand finished brass pieces. Each repeated shape has been pierced with a central hole, to create a mesmerising movement of refracted light within the design. The creation of order and form through layering, repetition and interconnection are key to this mathematically composed design, with each brass piece linking to and supporting the next. Element is made from sustainable recycled solid brass, and handmade in West Sussex.

Shown in Hand brushed brass.

Dimensions

Height 33cm 13"

Width 33cm 13"
