

MARTIN HUXFORD

MATRIX CHANDELIER

Infinite Possibilities The contemporary Matrix Chandelier is hand built from solid brass geometric sections which can be extended lengthways and widthways, creating a latticework of light to illuminate a long dining table or kitchen work surface. The linear geometry of the Matrix design lends itself to customised options for hallways and entrances. It can be hung in a series of repeated individual Chandelier modules, or assembled as a major centrepiece constellation of light.

Shown in satin brass .
