## MATRIX DIAMOND CHANDELIER

There is a satisfying symmetry to the shape of the newly launched Matrix Diamond chandelier which makes it a natural centrepiece light, whether specifying the 9 shade, or the larger 16 shade version. The Matrix combines balanced form with a dynamic lattice construction of solid brass pieces, made to order in 2 standard sizes and also available as a custom size. The Matrix design lends itself to customised options for hallways and dining rooms. Whether suspended in a series of repeated individual chandelier modules in an entrance hall, or assembled as a major centrepiece chandelier.

Shown in satin brass.
